Summary

Software engineer with 4+ years building backend and full-stack systems, from an SEO platform serving 8.9M+ requests/day to multi-chain Web3 (Solidity, Sui, Aptos). First Class BSc (Hons) in Applied Computing.

Experience

Anoc99 / Cloud Wind June 2023 – Present
Software Engineer *Manila, Philippines / Remote (Vietnam)*

- Led multiple projects in a 6-engineer team, building new systems and hardening SEO and security for the company's SEO platform serving 8.9M+ requests/day (nearly 30K page views/day)
- Owned the entire frontend of a financial management system as its sole frontend engineer, architecting a reactive Vue.js app with complex client state models and full-coverage tests against Java REST APIs
- Reduced API latency by 30% by optimizing backend queries and implementing a Redis look-aside cache
- Cut deployment cycle time by 70% by fully automating build and release pipelines
- Built a high-throughput PHP analytics engine with custom aggregation pipelines and live client dashboards

SMMILE August 2022 – May 2023
Software Engineer *Singapore (Remote)*

- Delivered 10+ major features across backend business logic and interactive UI by refactoring core clinical-workflow modules in PHP and redesigning relational database schemas
- Built a multi-chain Web3 NFT minting pipeline spanning EVM (Solidity smart contracts) and Move-based chains (Sui, Aptos), with React wallet integrations
- Containerized legacy monolithic CMS services with Docker and orchestrated deployments on Kubernetes (AWS), achieving full environment parity

Expa.Ai May 2022 – August 2022
Junior Backend Developer (Contract) *Yangon, Myanmar*

- Reduced customer response time by 40% by building a JavaScript chatbot integrated with messaging APIs
- Partnered with cross-functional teams to integrate backend APIs and launch 2 customer-facing web platforms

Projects

IELTS Free Practice | *TypeScript, Node.js, Cloudflare Workers* *Sole Creator & Engineer*

- Grew a web learning platform to 12,000+ active users within its first 30 days, adopted by regional language centers; now serves 39K+ unique visitors and 2.85M requests every 30 days
- Redesigned rate limiters for concurrent HTTP Range requests to fix audio-streaming bottlenecks under load

BlockLease | *Node.js, React, Solidity, Polygon, AWS* *Lead Developer, BSc Final Year Project*

- Designed tamper-proof document verification by anchoring cryptographic hashes on the Polygon blockchain
- Built role-based React dashboards and deployed AWS infrastructure via automated CI/CD pipelines

Technical Skills

Languages: TypeScript, JavaScript, PHP, Java, Solidity, Move, SQL
Backend: Node.js, NestJS, Express.js, Spring Boot, REST APIs
Frontend: Vue.js, React, React Native, Tailwind CSS
Blockchain: Solidity (EVM), Polygon, Sui, Aptos, Move, NFT minting, wallet integration
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: AWS (EC2, S3), Cloudflare Workers, Docker, Kubernetes, GitHub Actions, CI/CD, Linux
Spoken Languages: English (fluent), Burmese (native), Chinese (basic)

Education

University of Portsmouth Portsmouth, United Kingdom
BSc (Hons) Applied Computing – First Class Honours, GPA 3.85/4.00 *March 2026*

Pearson BTEC London, United Kingdom
Higher National Diploma (HND) in Computing (Application Development) – Merit *November 2023*

Certifications & Awards

AWS DeepRacer League – Top 4% Globally *October 2021*
Harvard CS50: Introduction to Computer Science *November 2021*
PCAP – Certified Associate in Python Programming *May 2021*
